

## **Professional Profile**

### **Engr. Prof. Dr. Muddasar Habib, July 2024**

I am currently working as a Chairman/HOD, Professor and Convener University Purchase Committee since 2018. I am indebted with more than 20+ Years professional experience starting from 2001 in industry, academia and research. As a professor I strive to be a role model that cultivates in the student mind, open their thinking with knowledge and improve their ability to look at the world critically.

Over the past 20+ years, I have worked as an academic in different parts of the world, teaching to university students from varying cultural backgrounds. My teaching experience (2006 to 2011) at the University of Nottingham, UK included the demonstration lectures in laboratory courses to B.Sc chemical engineering students from UK, Malaysia and China campuses.

My academic and research contributions have not gone unnoticed, with the winning of millions in national and international research grants and publishing in the HEC recognised national and international journals with an added pride of being the first Chairman of the Department of Chemical Engineering, UET Peshawar who got the level-2 OBE based accreditation in 2018 and to maintain that standard ever since.

As a sought after speaker in the field, I regularly present in the national and international conferences on professional topics related with Sustainability and OBE implementation for enhancing the learning experience.
